

Handleiding Wireless netwerk

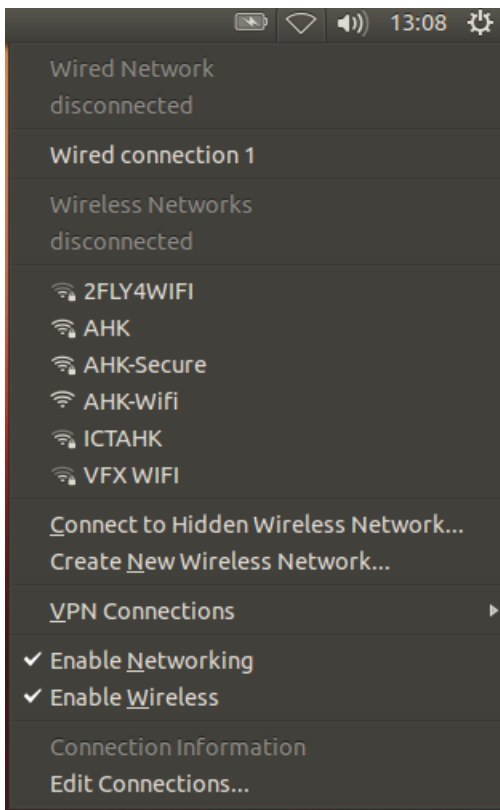

1 Verbinding maken met het netwerk

Selecteer het onderstaande icoon om beschikbare netwerken te zoeken.

Selecteer "AHK".

1.1 Wireless beveiligingsinstellingen

Selecteer bij de onderstaande velden de volgende opties :

Authenticatie : Protected EAP (PEAP)

Inner authentication : MSCHAPv2

Wireless Network Authentication Required

Authentication required by wireless network

Passwords or encryption keys are required to access the wireless network 'AHK'.

Wireless security: WPA & WPA2 Enterprise

Authentication: Protected EAP (PEAP)

Anonymous identity:

CA certificate: (None)

PEAP version: Automatic

Inner authentication: MSCHAPv2

Username:

Password:

Ask for this password every time

Show password

Cancel Connect

1.2 Beveiligings certificaat accepteren

Accepteer het beveiligings certificaat door te klikken op "Ignore".

NetworkManager Applet

No Certificate Authority certificate chosen

Not using a Certificate Authority (CA) certificate can result in connections to insecure, rogue wireless networks. Would you like to choose a Certificate Authority certificate?

Don't warn me again

Ignore Choose CA Certificate

1.3 Inloggen

Voer nu uw gebruikersnaam en wachtwoord in. Klik daarna op “Connect”.

Wireless Network Authentication Required

Authentication required by wireless network

Passwords or encryption keys are required to access the wireless network 'AHK'.
